PROFESSIONAL SUMMARY

Data Analyst with 2+ years of experience building end-to-end data pipelines, BI dashboards, and ETL workflows that turn raw data into business intelligence. Proficient in Python, SQL, Power BI, and Excel — delivering a 25% productivity boost, 30% reduction in project timelines, and 20% improvement in client retention through data-driven decision making. B.Tech in Computer Science Engineering from IIT Goa. Seeking Data Analyst or BI Analyst roles where data governance, KPI reporting, and stakeholder-facing insights drive measurable impact.

WORK EXPERIENCE

Digital IT Hub — **Data Analyst** *May 2024 – Present | Visakhapatnam, AP*

- Designed and own 3 production Power BI dashboards tracking 15+ KPIs across sales, operations, and finance — enabling real-time business intelligence for senior stakeholders.
- Built and maintain a daily ETL pipeline in Python and SQL automating data extraction, transformation, and loading from multiple sources, reducing manual reporting time by 40%.
- Conduct end-to-end data analysis on multi-source operational datasets, surfacing trends and actionable insights that directly inform business strategy and resource allocation.
- Partner with cross-functional teams to define data requirements, perform data governance checks, build analytical models, and present findings to leadership in structured reports.

ShowTime Consulting — **Associate** *Feb 2024 – May 2024 | Hyderabad, TG*

- Boosted team productivity by 25% and cut project timelines by 30% through process optimization, workflow redesign, and data-backed task delegation.
- Increased client retention by 20% by delivering consistent stakeholder reporting, identifying churn signals in operational data, and resolving key service inefficiencies.
- Developed KPI dashboards and data-driven reports that gave leadership visibility into team performance and project health on a weekly cadence.

Digital IT Hub — **Jr. Data Analyst** *Aug 2023 – Jan 2024 | Visakhapatnam, AP*

- Performed data analysis and statistical analysis using Python (pandas, NumPy) and SQL to generate business insights and performance reports for stakeholders.
- Supported Power BI dashboard development and led data extraction, cleaning, and transformation tasks — improving data quality and reducing downstream reporting errors.

EDUCATION

Indian Institute of Technology Goa *2019 – 2023*
B.Tech — Computer Science Engineering

Narayana Junior College, Visakhapatnam *2017 – 2019*
Class 12 — MPC | 92.1%

Dr. KKR's Gowtham International School, Visakhapatnam *2015 – 2017*
Class 10 | GPA: 9.8 / 10

PROJECTS

Heart Disease Risk — Predictive Data Analysis *(Python | SQL | Excel | Data Visualization)*

- Identified the top 5 modifiable cardiovascular risk factors from a 1,000+ patient dataset by performing end-to-end ETL, exploratory data analysis, and statistical modeling.
- Analyzed variables including age, cholesterol, blood pressure, and lifestyle indicators to surface actionable health insights for clinical decision-making.
- Delivered a structured analytical report and stakeholder presentation deck translating complex findings into clear, business-ready recommendations.
- **GitHub:** github.com/PraveenPadi/Business-data-analysis-for-Heart-disease-data-of-patients

Employee Compensation Analysis — Business Intelligence Report *(Python | Excel | Data Visualization)*

- Analyzed salary distribution patterns across 500+ employee records to uncover compensation inequities and benchmark pay across departments, roles, and experience levels.
- Built a structured data pipeline to clean, transform, and visualize key variables — delivering KPI-driven insights to support HR decision making and compensation planning.
- Produced a business intelligence report and executive presentation deck summarizing data-driven recommendations for leadership.
- **GitHub:** github.com/PraveenPadi/Employee-Salary-DataANALYSIS

E-SIGN — Web-based PDF Editor & Digital Signature System *Aug 2022 – Apr 2023*

- Built a full-stack PDF editor supporting page manipulation, object-level editing, and legally compliant digital signature creation for enterprise document workflows.
- Implemented password-based PDF encryption/decryption in compliance with the IT Act, ensuring data governance and document security standards.
- **Tech Stack:** Node.js, React.js, PDF.js, Fabric.js, HTML5, CSS, JavaScript.

TECHNICAL SKILLS

Languages & Query: Python, SQL, JavaScript, HTML, CSS

Data & BI Tools: Power BI, Microsoft Excel, Data Visualization, Statistical Analysis, KPI Reporting & Dashboarding, Business Intelligence

Data Engineering: ETL Pipeline Development, Data Extraction, Data Transformation, Data Cleaning, Data Governance

Libraries & Frameworks: pandas, NumPy, matplotlib, seaborn, React.js, Node.js

Database: MySQL

Tools & Platforms: Git, Linux, MS Office Suite

Exposure: BigQuery (learning), Azure Data Studio

CERTIFICATIONS

- SQL Advanced — HackerRank
- SQL Intermediate — HackerRank
- SQL Basic — HackerRank
- Full Stack Web Developer — Udemy
- EF SET English Certificate — C2 Proficient (94/100)

ACHIEVEMENTS & AWARDS

- Secured All India Rank 423 in JEE Advanced out of ~1.5 lakh candidates.
- Qualified NTSE (National Talent Search Examination) — 2018.
- Qualified KVPY (Kishore Vaigyanik Protsahan Yojana).
- Qualified for multiple Regional-level Mathematics Olympiads.
- Awarded 2nd Prize in Basketball Tournament at district level.

POSITIONS OF RESPONSIBILITY

- Captain, Basketball Team — Led IIT Goa to victory at Inter-IIT Sports Meet, IIT Delhi (2022).
- Student Mentor — Mentored junior students at IIT Goa over 3 years (2020–2023).
- Core Member, Photography Club — IIT Goa (2019–2023).
